Produced on the Prairies! Ag Days 2024 Celebrates Western Canada's Contribution To Everything Agriculture!

WELCOME BACK! After last year's record breaking event, we are very excited for the 47th Manitoba Ag Days 2024 show at the Keystone Center in Brandon, MB, running January 16th, 17th, and 18th! As the industry gets back to normal, you'll see our exhibitors showcasing their full portfolio of cutting edge products, solutions, and services. While the last few years have been a challenge, producers and service providers in this industry pressed on and got the job done! Agriculture is truly essential! Manitoba Ag Days is honored to host an event that brings everyone together to learn, network and grow. The business of agriculture is based on relationships and trust and we are very proud to host an event that joins all the greatest members of this industry together in one place. Ag Days 2024 features new partnerships and new events, which are all brought together under the theme, Produced on the Prairies!

IMPORTANT TICKET INFORMATION:

Same as last year, tickets will be required for attending Manitoba Ag Days. These can be purchased for \$15 in advance or \$20 at the show. Please visit www.agdays.com/tickets to buy your tickets. Youth 17 and under are complimentary but will still require a ticket to attend. Walk-up tickets are available at the Dome Building, signs will be posted as you enter the Keystone Centre grounds. We have created a handy online resource for any information you may need on tickets, entrance requirements and facility layout. It can be found at www.agdays.com/know-before-you-go/. We kindly suggest purchasing your tickets in advance, not only for your convenience but to move the line up into the facility quickly.

INNOVATION SHOWCASE:

Back for the 5th year, our popular Innovation Showcase returns with 32 entries competing for the top spot in one of our 7 key agricultural categories. The list of entries is sure to interest everyone from all facets of agriculture! Please check out all the new product descriptions presented later in this show guide.

SPEAKER PROGRAM:

For the 2024 show Manitoba Ag Days' program features 63 world class speakers to the MNP and FCC theatres highlighting all of the important topics of today's agriculture. The topics of agronomy, weather, grain and fertilizer markets will be the focus, as well a large spotlight on our "Produced on the Prairies" theme. We're excited to welcome Western Canadian food & beverage entrepreneurs Alfred Henry Lea from Tomahawk Chips, as well as Graham Sherman from The Tool Shed Brewing Company. Brett Gardiner, The Canadian Professional Rodeo's "Announcer of the Year" joins us to share his message on the "Chase the Good" tour! Be sure to check out the speaker schedule and plan accordingly, all three days are jam packed with many "must sees"!

MB AG DAYS / GREAT TASTES OF MANITOBA PARTNERSHIP:

In celebration of the 35th anniversary season of Great Tastes of Manitoba, the producers of Manitoba's most watched cooking show have partnered with Manitoba Ag Days to create a series of videos about the community of passionate people who work in Manitoba's agricultural and agri-food sector. We're very excited to announce that three new Great Tastes of MB video will be released at the show! Check out www. greattastesmb.ca and www.agdays.com for more details.

PRODUCED ON THE PRAIRIES: CRAFT BEER TASTING EVENT

The Craft Beer industry in Western Canada has exploded in recent years, all with companies passionate about their unique product. Join us on Monday evening January 15th at 7 PM to help us kick-off the show at the Dome Building for this fun and entertaining event! Sample an incredible line up of expertly crafted brews, meet the entrepreneurs and business owners behind these brands and walk away with a new favorite beer. \$40 per ticket and we don't go home until the kegs are dry! Tickets are available at: www.agdays.com/craft-beer-event/

AG DAYS GIVES BACK AND 50/50:

Our 50/50 draw is instrumental in allowing us to contribute to so many organizations around the province, and we couldn't do it without your support! The winner in 2023 took home a whopping \$34,945.00 and this year it could be you! Get your 50/50 tickets in person at the show, or buy tickets online at www.agdays.com/buy5050. Tickets are 1 for \$10, 4 for \$20, 20 for \$50, and NEW this year 100 for \$100. All of the Ag Days Gives Back proceeds are distributed to ag education and not-for-profit organizations in the communities where our patrons and exhibitors live.

THANK YOU TO OUR SPONSORS:

Thank you to the many sponsors of Manitoba Ag Days; your generous support over the 47 year history of this event has been instrumental in its success and longevity. To our patrons, you will find our sponsors mentioned on various pages of this guide, please take the time to thank them when you visit their displays!

Take care and we look forward to seeing you all at Ag Days 2024, January 16th to 18th 2024! It's Where the Ag Year Begins, and we celebrate everything that is "Produced on the Prairies"!

Stay Warm, Stay Safe & Enjoy the Show!

Wab Kinew Premier of Manitoba

I am pleased to extend greetings to all those attending the 47th Annual Manitoba Ag Days Show. Our government is committed to working on behalf of all Manitobans across the province.

The Manitoba Ag Days show is Canada's largest indoor farm show, featuring over 550 exhibits and more than 60 speakers. Manitoba is honoured to host this exhibition of agricultural production, expertise, technology, and equipment and welcome exhibitors and visitors from across Canada. This event also provides the opportunity for those in the agricultural sector to build relationships, learn from each other, and share their successes.

Agriculture is vital to Manitoba. It creates jobs, provides food, and bolsters the economy. Thank you to everyone working in the agriculture sector and a special thank you to the dedicated staff and volunteers for all their hard work towards making Manitoba Ag Days a continued success.

Ron Kostyshyn Minister of Agriculture

On behalf of the Province of Manitoba and the Department of Agriculture congratulations on celebrating the 47th Annual Manitoba Ag Days. This year's theme of "Produced on the Prairies" is an excellent opportunity to highlight and celebrate what our Province has to offer.

Manitoba's agriculture industry continues to adapt to the changing business environment and this event is an excellent way for farming communities to come together and work towards building a strong and sustainable agriculture sector in Manitoba. Ag Days is Canada's largest indoor farm show. Year after year, patrons return to discover advancements and innovations in the industry and to find solutions to challenges to prepare for the future.

Manitoba's agriculture and agri-food sector is strong and growing and it is important we continue to work collectively to find solutions for sustainability and responsible growth while managing challenges and risk. Agriculture remains the cornerstone of Manitoba's economic past, present and future. I wish you a successful event.

Jeff Fawcett Mayor of Brandon, MB.

On behalf of Brandon City Council and the residents of Brandon, I am thrilled to welcome everyone to Brandon as we celebrate the 47 th Annual Manitoba Ag Days. Known as Canada's Largest Indoor Farm Show, Ag Days is certainly one of the most highly anticipated and appreciated events of the year for everyone in Agriculture.

As the proud host of this show, we are grateful to continue to host this most important event at our fabulous Keystone Centre, which of course, was built with agriculture in mind. Ag Days is a hallmark event on Brandon's calendar too. With over 550 exhibitors, there will be as many visitors attending the show over the three days as there will be the 50,000 people who reside in our city.

Agriculture is big business, certainly for producers, suppliers, manufacturers and advisors. This industry is becoming more

and more complex and yet so crucial to providing the world with food.

Ag Days is a must-attend occasion for everyone in the sector to view new products, equipment, technology, best practices and new information. Above all else, it is a great opportunity to meet friends and neighbors and make new acquaintances.

I am pleased to congratulate the Board of Directors, staff, volunteers, exhibitors, sponsors, and participants on what is sure to be another spectacular show. I trust each of you will have a wonderful show, serving as a great kick-off for an exciting, productive, and healthy 2024.

Know Before you Go! 2024

Our commitment to the health & safety of our patrons, exhibitors and staff is paramount in all of our decisions. These are our key priorities as we welcome you to Manitoba Ag Days. From purchasing tickets and entering the Keystone Centre to buying food and finding your favorite booth, please read below to understand the entry requirements and protocols. Check back to this page regularly for updates.

Mobile tickets will be used for entry into Manitoba Ag Days. We can either scan your ticket from your phone, tablet or the paper copy of your ticket. Please purchase tickets in advance at:

www.agdays.com/tickets/

Walk up tickets will be available on site during the three days of the show at "The Dome Building".

Cashless Venue

The Keystone Centre prefers to be a cashless venue. Payments can be made by credit, debit and/or digital methods. Some canteens will still accept cash – please see signage in the facility.

Cash payments will still be accepted for onsite tickets for Manitoba Ag Days and to purchase 50/50 tickets during the show.

Parking & Entrances

On-site parking is included in your admission ticket. There will be a shuttle bus sponsored by Mazergroup & Murray Chev Olds Cadillac, Buick, GMC in the parking lot to take you to one of the 5 entrances.

Mask Friendly Venue

Masks will NOT be required inside the Keystone Centre. However, the Keystone Centre is a mask friendly venue; the intent is to provide a welcoming, safe and respectful experience at the venue.

Thank On behalf of the board of directors of Manitoba Ag Days we would like to thank Christine Roskos for her dedication, determination and resilency as our Office Manager! Her contributions to Manitoba Ag Days have been invaluable to our team and we are grateful for all that she has done for the success and growth of our show. Christine is one of the most genuine, hard working and loyal people we have ever met. She knows our exhibitors by name and has always gone above and beyond to do what is best for the show. She will be missed dearly. Please stop in the show office to wish her well during the 2024 Show as she retires in April to pursue other goals. #agdaysfamily #statusquo On behalf of the entire Agriculture Industry THANK YOU CHRISTINE!

MB Canola Growers Association TUESDAY, JANUARY 16 - AM

Manitoba's Most Wanted

9:30 AM

Chris Manchur, Agronomy Specialist, Canola Council of Canada, @ManchurCCC Courtney Ross, Agronomy Specialist, Canola Council of Canada, @rossCCC_

Courtney Ross

Canola production in Manitoba over the past growing season was met with many challenges, including drought, diseases, and insects. Some notable insects that have caused issues for growers were flea beetles, diamondback moths and lygus bugs. As for diseases, blackleg and verticillium stripe were prevalent, while later in the season, sooty molds and powdery mildew appeared. Chris and Courtney will highlight the top pests and pathogens that are "Most Wanted" here in Manitoba, and what strategies can be taken to manage them effectively in future growing seasons.

Seeding Canola: Getting it Right

Dr. Amy Delaquis, Research Manager, Manitoba Canola Growers Association, @mymangin Chris Holzapfel, Research Manager, Indian Head Agricultural Research Foundation, @CBHolz13

Dr. Amy Delaguis
Research Manager

Chris Holzapfel
Agronomy Specialist

0.5 PD

Dr. Delaquis and Chris will look at results from canola field trials focused on phosphorus (P) fertilizer formulations/blends, application rates and placement methods. This work compared the effects of contrasting granular fertilizer forms, applied in the seed-row at a wide range of rates, on canola establishment and yield. We will also look at furrow vs side band placement of P results. Preliminary results from Manitoba Canola Growers On-Farm Research Program, including seed-placed fertilizer toxicity and seeding rate optimization for canola across Manitoba growing conditions will be discussed.

Moderator: Lionel Kaskiw, Crop Production Extension Specialist, Manitoba Agriculture @MBGovAg

Dr. John Gavloski, Entomologist, Manitoba Agriculture @MBGovAg David Kaminski, Field Crop Pathologist, Manitoba Agriculture @MBGovAg Kim Brown-Livingston, Weed Specialist, Manitoba Agriculture @MBGovAg Anastasia Kubinec, Agronomist, Paterson Grain @aggielovesgeer

9:15 AM

1.5 IPM

The crop specialists on this panel will dig deeper into the pests that affect crops, especially when conditions were more severe as it was in 2023. Weeds, diseases and insects plague crops every year to some extent but recent conditions will have effects that carry over for many years. How can we prepare for the long lasting effects? This panel of experts will raise some of those issues and hopefully give you an edge in 2024. Come prepared to have your questions answered.

Start Strong to Stay Out of the Weeds

Dr. Breanne Tidemann, Weed Scientist, Agriculture and AgriFood Canada, @breannetidemann

Early cropping season decisions can have a significant outcome on your end of season success with weed management. Dr. Tidemann will cover some practical strategies informed by research and some commercially available tools and strategies to help with weed management decisions. She will address: pre-seeding burn-offs and multiple effective modes of action, herbicide layering and residuals, management of other pests and their potential impact on weed management and how early is too-early to think about managing in-season weeds.

Dr. Breanne Tidemann Weed Scientist

Anita Renwick, Agronomist, P. Ag, CEO of A1 Agronomy, A1 Agronomy, @A1Agronomy

Have a trouble field? Want to reduce fertilizer costs while raising yields? Anita will discuss three ways to impact your bottom line while reducing your fertilizer footprint through advanced zone field-mapping SWAT MAPS technology and experienced boots-on-the-ground agrologists. Applicable info on how to save money and time.

Marketing with a Different Lens TUESDAY, JANUARY 16 - PM

Removing Emotions in Grain Marketing

1:00 PM 0.5 PD

Keith Brownell, Manager, Country Grain Marketing (East Region), Viterra, @kb_viterra_mbsk

There are many factors beyond your control when it comes to grain marketing. Fortunately, there are also essential elements that are within your control. Aligning your purpose and goals with day-to-day and long-term business decisions can lead to better outcomes and less regret. Often what our 'gut is telling us' leads to less-than-ideal outcomes. A clear understanding of how you make and communicate decisions on your farm can often lead to less 'second guessing' and better results. Join Keith as he shares concepts and ideas to help you better understand how to take the emotion out of grain marketing. He will also explain how to apply the RASCI model (RASCI) to help align grain marketing decisions on your farm.

Geopolitics in 1:45 PM 10PD Concertain Times

David Frum, Social & Political Commentator, Staff Writer at The Atlantic, @davidfrum

Violent conflict all over the world. Political uncertainty in the United States, Europe, and other top trading partners. Inflation and interest rates weighing upon the Canadian economy. These are disturbing times for businesses and families. Is there any hope in the storm? Join David as he enlightens us on his thoughts and predictions. Let him challenge you to think big.

One of a Kind Canadian College ACC Prairie Innovation Centre

Tim Hore, Dean of Ag & Environment, Assiniboine Community College, @accmb

2:50 PM 0.5 PD

Assiniboine Community College has a long and successful history of delivering agricultural programming that is responsive to industry needs. Agriculture contributes 62,000 jobs to the Manitoba economy and it's estimated that 1 in 3 jobs will go unfilled by 2029. Since 2016 there has been over \$1.5 billion in private investment in the sector. The Prairie Innovation Centre for Sustainable Agriculture is the next logical step to support the demand for skilled and experienced agricultural training in Manitoba. Learn about ACC's vision of this one-of-a-kind Canadian college project to grow from 300 students in agriculture, environment and related technology programs to over 800 students.

Grain Markets: Today & Tomorrow

3:20 PM 1.0 PD

Gerhard Greyling, Grain Advisory Services Regional Market Analyst, Cargill Ltd., @cargillagcanada Edward Brochinski, Grain Advisory Services Lead Market Analyst, Cargill Ltd., @cargillagcanada

How do grain markets react to global supply and demand fundamentals, geopolitical and global financial market conditions? Join Gerhard and Edward as they talk about the current and future trends in the grain markets.

Landing in the Field of Agriculture

Cade Cruickshanks, Articling Accountant, @cadecruickshanks

1:00 PM

Despite coming from an agricultural background, Cade's career path was headed towards sports. Join Cade as he shares how his many experiences in 4-H and his early job opportunities drew his attention back to agriculture. He will discuss his journey, from opportunities to challenges, and how he landed in agriculture. Cade has discovered the ag industry has endless opportunities for youth that will create meaningful careers while positioning the industry for future growth.

4-H to AgriTech: 1:07 PM

The Unlikely Journey to the Heart of Agriculture

Hashim Farooq, Crop Data Analyst Intern, @hashimfar

Dignitaries Address 1:15 PM

The Honourable Ron Kostychyn, Minister of Agriculture His Worship Jeff Fawcett, Mayor of City of Brandon David Beaudin, Minister of Agriculture and Associate Minister of Education, Manitoba Metis Federation

Hashim will offer thoughts on the future workforce in agriculture and how farms and businesses can connect with emerging talent in meaningful ways. Join Hashim as he shares his own journey that started with early involvement in 4-H and led him to an exciting career in agriculture. He will discuss how his interests in technology and agriculture give him a unique perspective and how mentorships and work experiences have drawn him into the agri tech industry.

How does Bill C-208 benefit farming 2:00 PM operations?

0.5 PD

Edith Frison, CPA, CA, Bus. Advisor, Taxation Services, MNP, @MNP_Aq Ashley Andrews, CPA, Bus. Advisor, Taxation Services, MNP, @MNP_Aq

Most farm businesses would like nothing more than to pass on their operation to their children or another family member to watch it continue to grow and thrive. Join Edith and Ashley as they discuss what Bill C-208 entails and how it can make farm transitions more tax efficient.

The Story of Tomahank Chips

Alfred Henry Lea, Entrepreneur, National Canadian Chip Corporation, @tomahawkpotatochips

2:30 PM

Come and hear the story of Tomahawk Chips as Alfred will describe his entrepreneurial journey. In order to reach one's goals you must never give up, believe in yourself and work hard; then things will start falling into place. The task of getting products on the floor requires constant hard work to get in front of distributors and retailers to leverage partnerships for future opportunities. Come and see how this "Produced on the Prairies" product got its start.

Going After the Thing You Want in Life

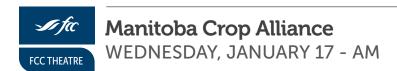

Graham Sherman, Entrepreneur, The Tool Shed Brewing Company, @ToolShedBeer

3:00 PM 1.0 PD

SPONSORED BY:

Graham Sherman and his business partner started with no money and no experience and created a business built on a "hop". Shortly after Graham guit his secure and comfortable day job, he learned what he wanted to do was actually illegal in his home province. Graham quickly discovered how important creative thinking and resiliency are to fuel entrepreneurial passion. Join Graham as he shares his lessons learned and what to do when the spark happens and how to overcome challenges. Come and see how this "Produced on the Prairies" product got its start.

Global Jertilizer Market Outlook 9:30 AM

Noah Bishop, Trader, ADM Fertilizer

1.0 PD

Hear from Noah, as he shares his knowledge on the global approach to supply and demand side factors that affect the international trade of Urea, Monoammonium Phosphate, Ammonium Phosphate and Potash. Noah will touch on the local, provincial, national and global markets.

Grain Rail Transport: Are we on the Right Track?

Dr. Derek Brewin, Professor, Head Department of Agribusiness and Agricultural Economics, University of Manitoba

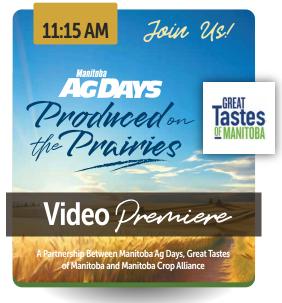

10:25 AM 1.0 PD

The history of rail transportation in Canada is filled with regulation and grain transportation has been a special focus. Recent changes to regulations in rail transport have generated investments in rail cars, terminal capacity and track. Join Dr. Brewin as he discusses some of the history, the economics of railways and why some regulations are required. Recent gains and losses will determine the future of these regulations for the grain industry.

Dr. Derek Brewin

Professor, Head Department of
Agribusiness and Agricultural Economics,
University of Manitoba

When does Tile make Cents?

David Whetter, Consultant, AgriEarth Consulting Ltd.

11:20 AM

0.5 SW

Tile drainage is in the early stages of adoption in Manitoba and across the broader Canadian Prairies, but is rapidly emerging as a prominent improvement practice. Join David as he provides a basic overview of tile drainage, as well as a discussion of some of the benefits and costs associated with the practice, specifically in cold climates. He will share research data to further enhance his presentation.

On the Jann or in the Cloud?

Darcy Herauf, Director, FCC-AgExpert, @pharmer00

9:30 AM 0.5 PD

Darcy will give an overview of the value of digitizing farm records and how being able to safely share data in a trusted environment is critical. Learn about options that are available and how to implement them on your farm. From paper to spreadsheets to farm software programs; do they all have a fit? Find out how putting this information in the cloud will allow you to export data and safely share with your farm advisory team there by mitigating your risk.

Weather 2024: More Extremes or Back To "Normal"

10:00 AM

1.0 CM

Drew Lerner, President and Senior Agricultural Meteorologist, World Weather Inc., @worldwx Weather in the Prairies the past few years has been nothing less than challenging. Drought continues to grip parts of the region and the weakening El Nino event coupled with both the lingering effects of the Hunga Tonga Volcano and changing ocean temperatures in the eastern Pacific will determine whether drought will prevail or break down. Drew will provide a detailed assessment of the state of the atmosphere in North

Social: The Ag

America and the most likely direction for weather in 2024.

11:00 AM 1.0 PD

Moderator: Sarah Leguee, Producer, Leguee, Fillmore, SK, @sarahleguee John Kowalchuk, Producer, Trochu, AB, @kowalchukfarms1 Amy Smith, Producer, Gladstone, MB, @_that.farming.mama_ Andy Pasztor, AndyClean, Tillsonburg, ON, @lamAndyclean

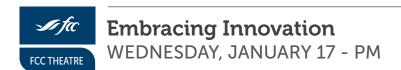

Producers are often advised to 'share their ag story' on social, but what does that really mean? Each of these producers has a different farm story and a different way they share it; join them to learn about the realities of being an ag influencer. Hear how they use their social channels to build their networks, monetize their social time and navigate transparency and privacy. You'll leave inspired and better equipped to connect on social.

Precision faming Machinery: From Classic to Cutting-Edge

Matt Yanick, President, My Precision Ag, @MYPrecisionAg

Modernizing existing or older machinery on your farm with the addition of precision farming technology can be a great alternative to buying new machinery. Matt will address potential solutions for many different applications on the farm including: tractors, seeders, sprayers, harvesters and more. Matt will give some personal recommendations for farmers considering these upgrades and the next steps to take to ensure a successful upgrade process.

Refining Precision Agronomy

1:50 PM 0.5 NM

Amber Knaggs, Senior Precision Agronomist, SWAT MAPS, @knaggs_amber Trevor Freisen, Product Owner, SWAT MAPS, @SWATMAPS_Trevor

Precision agronomy has become increasingly widespread, however uncertainties remain surrounding the optimization of precision agronomy techniques, to enhance return on investment and promote sustainable farming practices. Amber and Trevor will explore the current equipment and technological advancements and various agronomic methods to provide valuable insights.

2:30 PM

Matthew Johnson, VP Education and Digital Ag, Volatus Aerospace, @AerialEducato

Have you wanted to start using drones on your farm? Matthew will discuss equipment options, regulations, and agriculture specific applications of drones! Join Matt to learn about the use of spray drones, drone swarming, and career opportunities in ag!

Al in Ag: Transforming the World's *Pldest* Profession

Jim Carroll, Futurist and Innovation Expert, @futuristjimcarroll

Whether it's driverless tractors, weed-zapping robots, or data-transmitting crops, the future of farming is happening faster than you might think! We're rapidly transitioning into a world of 24-hour farming, no longer restricted to farming only when the sun is up! Growers that focus on innovation as a core value will find success; their innovation will focus on the triple-feature need for growth, efficiency, and ingestion of new science. It will be by adopting new methodologies, technologies, products, partnerships, and ideas that they will learn to thrive.

3:30 PM 1.0 PD

Is There Money in Beef?

Ben Hamm, Farm Management Specialist, Manitoba Agriculture, @MbGovAg

1:00 PM

Do the record high prices for beef in the fall of 2023 change the economic outlook for the beef herd going forward? Join Ben as he focuses on the beef cost of production and the key factors that affect profitability.

1:30 PM What's Your **Succession Plan?**

Tere Stykalo, CPA, CGA, Regional Agriculture Leader, MNP, @MNP_Ag

With everything you've worked so hard to build, you don't want to leave anything to chance. Succession planning is essential to answer the all-important questions around what comes next for you and your family. Join Tere and a panel of advisors who will speak to real life situations faced by producers and how MNP helped them overcome these challenges, ensuring their farming operation stays competitive and profitable for generations to come. These advisors come from a field of assurance, tax, and consulting.

"Chase the Good" Town

Brett Gardiner. Canadian Professional Rodeo Announcer of the Year, @brettjgardiner

bid.com

4:15 PM

Bucking the Trend 2:15 PM

Duane Thompson, Producer, Tee Two Land & Cattle Co., @teetwodmt_duane

Join Duane as he shares his family's multi generation story about being a true mixed farm operation in Kelliher, Saskatchewan. In the past there was a belief that a single enterprise operation was the only way to succeed. Duane's family has operated for 125 + years as a mixed farm. Duane will talk about his farming operation system and why his family chose to "Buck the Trend".

A Vet's Perspective: Calving **Season Tips & Tricks**

Dr. Grayson Ross, Veterinarian, Innovative Vet Services

1.0 PD

Calving season is the most exciting time of year for many beef producers, but does not come without its trials and tribulations. Come learn about common health issues and currently recommended treatments in newborn calves, managing difficult births, and utilizing veterinary resources efficiently. Join Dr.Ross and his special guest Clover the Cow to learn more calving season tips and tricks.

What a farmer or rancher goes through in their day to day routines often go unseen. The stress is real, the numbers are big, and the risk is often overwhelming. CLHbid.com is proud to partner with Brett Gardiner LIVE and kick off the CHASE THE GOOD tour at Manitoba Aq Days. Gardiner is the most-awarded announcer in Western sports history having been named the Canadian Pro Rodeo Announcer of the Year for the past twelve seasons. He can be found behind the microphone at many rodeo events; but more than that, Brett strongly advocates for mental health and wellness and is one of the most sought-after speakers in mental health, performance, and motivation. Gardiner often speaks candidly about his mental health journey, and through his own lived experiences, he works to inspire and educate others to help them live their very best life. Together with his family, the Chase the Good movement was started to encourage humankind to chase what is good in the world.

To Maximize or to Epstimize

9:30 AM

0.5 NM

Edgar Hammermeister, PAg, Western Ag Professional Agronomy, @Edgar_Hammer

Though farming is sometimes painted as a lifestyle, ultimately it is a business that is only sustainable if the economics work. Matching crop management to the potential of the land rather than to aspirational yield targets is key to better profitability and environmental sustainability. Understanding your soil attributes and soil tests is critical to optimizing both yield and profitability. Join Edgar as he discusses how the variability in growing seasons over the past few years has not only impacted crop yields but also nutrient dynamics in the soil.

Optimizing P Fertilizer and P Fertility Management on Your Farm

Dr. Don Flaten, Professor Emeritus, Department of Soil Science, University of Manitoba, @donflaten1

10:15 AM
10 NM

Or. Don Haten

Manitoba's cold soils at planting and short growing season create special challenges for Phosphorus (P) nutrition in our crops and P fertilization practices. Phosphorus is an essential nutrient for all living organisms and we need to think about the where, when, why and how we use it in our systems. Don will summarize and update a recent review of P management research in the Northern Great Plains that provides the science base for short term management of P fertilizer and long term management of P fertility in this region.

Looking at Your Howsony Team

Tim Lang, Business Advisor, FCC, @FCCagriculture

11:15 AM 1.0 PD

When it comes to managing your farm efficiently everyone instantly thinks about man power and tractor power. They say it takes the average farm 21 days to seed and 21 days to harvest (minus any bumps in the road from Mother Nature). Farms upgrade equipment as required to make this timeline realistic based on the number of acres they have to seed. But do we change our business strategy or transition plan as we increase in size or responsibility? Assembling a strong support team for your farm will help your team thrive and your business prosper. It is important to have a mentor in all facets of business and this has never been truer for the farm population. Your mentor may be your grandfather or your father or your uncle but it might also be your neighbor or your friend three provinces over. Your farm team consists of more than your employees; it also includes the banker, the lender, the accountant, the book keeper and the lawyer. Tim will talk about how he helps farms build these relationships through the transition process so that the next generation comes out stronger, better prepared and ready to communicate openly.

MB Pulse & Soybean Growers THURSDAY, JANUARY 18 - AM

Dr. Daryl Domitruk, Executive Director, MPSGA, @MbPulseGrowers

A partnership between Manitoba Ag Days, Great Tastes of Manitoba and Manitoba Pulse and Soybean Growers Association

Soil is a Busy Place. What's Going on Down There? 11:15 AM

1.0 SW

Stephen Crittenden, Research Scientist, AAFC, @Steve_Crittende Matthew Bakker, Assistant Professor of Microbiology, University of Manitoba, @Bakker_Lab

Charley Sprenger, Project Leader, PAMI, @PAMI_Machinery

Soil is filled with life – an amazing web that we can not easily see because it exists at a microscopic scale. However, by focusing a farming lens on microscopic soil life, we are now revealing how life in the soil micro-organism community can support Manitoba crops. We've discovered that soil life needs to be healthy to perform functions important to a successful crop and to prevent counter-productive functions from taking over. But soil health is complicated; micro-organisms have intricate relations with the physical and chemical components of soil. Fortunately, this knowledgeable panel will show local research that has identified the most critical factors farmers can manage to achieve and sustain healthy soils.

Crop Potation Under the Microscope

Dr. Yvonne Lawley, Assistant Professor, Department of Plant Science, University of Manitoba, @YvonneLawley_UM

Diverse crop rotations have long been known to improve the stability of crop yields over time by disrupting pest cycles and diversifying risk. New crops like soybean and peas have created opportunities for adding diversity to crop rotations in Manitoba. With the growing interest in management practices to build soil health throughout Manitoba, what role can crop rotation play when balancing short term needs with long-term goals? This presentation will explore crop rotation studies from Manitoba and the biological soil health indicators that were responsive to management in our Prairie soils.

A Complex Tale: Root Rot of Pulses

A partnership between Manitoba Ag Days, Great Tastes of Manitoba and Manitoba Pulse and Soybean Growers Association

Dr. Syama Chatterton, Research Scientist, AAFC, @syamachat

Root Rot is an issue and Dr. Chatterton will delve into the current research on the main culprits and the role they play in driving disease in the field. The challenges and lessons learned from field trials tell the complicated story of these disease complexes and the ongoing field research into managing the disease will be presented. We want to see more pulses in Manitoba and Syama is going to teach us what we need to do to see pulses thrive in our rotations.

Does Variable Rate Technology Fit on Your Farm?

1:00 PM

Moderator: Jay Whetter, Communications Manager, Canola Council of Canada, @kenorajay Chantal Bauche, PAg CCA, SWAT MAPS, @BaucheChantal Jason Claeys, Producer, Deloraine, MB, @JasonClaeys9 Landon Friesen, Producer, Crystal City, MB, @landon707

Jason Placys

Jandon

Join this panel for a frank discussion about the benefits and challenges of variable rate fertilizer application. Farms are unique and so are the panelists, but they are all farmers who are at different stages of implementation of variable rate technology. In this interactive session, three farmers will share their experiences with this precision practice and Jay will encourage audience guestions.

A Customer-Driven Ammonch to Equipment

Scott Fairburn, Global Seeding Product Specialist, CaselH

2:30 PM 1.5 CM

Farmers face challenges every day and they need brands to deliver solutions-based products, especially in ag machinery. In order to create reliable, intuitive machinery and technology built for purpose, customer-driven engagement and product development is critical. Hear from Scott as he dives into how farmer involvement in the research and development process delivers purposeful solutions that help make on-farm activities more productive, more efficient and more profitable.

Leveraging Technology to Boost Your Farming Operation 1:00 PM 0.5

Steve MacLean, Senior Manager, Digital Services, MNP @MNP_Ag
Jon Temple, CPA, CA, Partner and Business Advisor, MNP @MNP_Ag

Today's producers are looking for modern approaches, new technology, and the application of data to reduce risk and improve their bottom line. But where and how to start investing isn't always clear. Join Jon and Steve as they discuss how to get started with leveraging technology on the farm to become more profitable.

The Science of Soil Salinity

Marla Riekman, Soil Management Specialist, Manitoba Agriculture, @MbGovAg 1:30 PM 0.5 SW

Despite what the name implies, soil salinity is a water problem and not a salt problem. It is important to understand how different soil, landscape and climate factors influence the development of salinity in the field. Determining the severity of salinity will help to create an action plan for how to best manage it, whether through crop management or improved soil drainage. Join Marla as she kicks off our afternoon of salinity presentations.

Salinity, is Tile the Answer?

Aaron Hargreaves, Producer, Brandon, MB, @204aaron

2:00 PM

Aaron will talk about their farms' experience with drain tile over the last ten years, starting with why they decided to give tile a try and how they got started. He will share their experience with the different tile strategies, and which worked best on their farm as well as how they calculated installation cost and return on investment. Come hear Aaron's answer to the question, "Can tile fix salinity?" as he shares how tile benefited their farm in some unexpected ways.

#Plant24 #Harvest25

2:30 PM

Kurt Shmon, Agronomist, Imperial Seed, @kurt_shmon

0.5 CM

Are you needing to add another crop into your rotation? What about low input, high net return crops? Worried about nitrogen cost? If so, you won't want to miss this! Kurt will take you through forage and turf seed crop options from field selection to harvest, including seed storage and production contracts. He will highlight options that spread out harvest, fix nitrogen and offer feed and grazing options. Catch this presentation for a run down on these species and how they can have a fit on your farm.

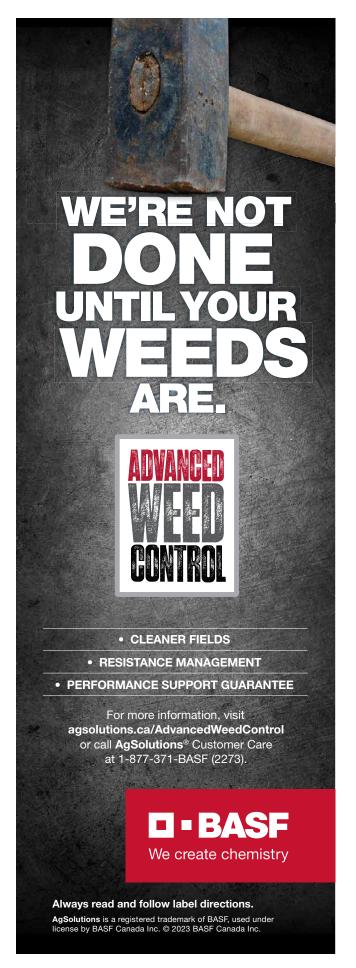

Forages for Salinity use, Maybe not What you Think.

3:00 PM 1.0 CM

Dr. Douglas Cattani, Perennial Crop Breeder, University of Manitoba

Some plant species can persist under adverse soil conditions. A number of forage species are able to grow for many years in a high salinity growth environment. Osmotic stress, the ability to move water from the soil into plant roots due to high concentration of ions in the soil solution, and ion toxicity, the accumulation of toxic ions in leaves, are the two primary ways that plants are impacted by salinity. Some species have greater salinity tolerance than others and there has been some selection within species for saline tolerant cultivars. A saline growth environment will not be as productive as a soil with a lower salinity value and cultivars that have greater saline tolerance will have lower overall production amounts, especially at lower salinity levels. The critical step in the use of salinity tolerant forages is in the establishment of the stand. Dr. Cattani's talk will highlight the important considerations needed in both choosing and selecting a saline tolerant forage species of forage mixture.

Organics @ Ag Days Tuesday Jan. 16

GROUND TRUTH AGRICULTURE INC.

INNOVATION DESCRIPTION

Consistent, Objective, Quick

Our benchtop grain grading device utilizes machine vision to identify the visual characteristics required for determining the quality. You pour your grain sample through and within seconds it will identify what is present, how much there is and what the grade of the grain is. This allows for farmers to optimize their inventory by understanding why their grain is what grade, and have knowledge when marketing and transacting their grain.

BISON ENTHUSIAST EMBRACES SUSTAINABILITY

When Assiniboine alumnus Carter Baranyk was a child, he loved museums.

"I remember my grandpa, when we would go to Winnipeg, we would go to the Manitoba Museum, or the Museum of Man and Nature," he says. "And the first thing you would see is a big bison hunt display – a Métis man on horseback, chasing a bison herd."

It was a compelling display that had a big impact on young Carter, creating a life-long fascination with bison.

"I am a huge history buff. I love history, and they were always a huge symbol of the West and the prairies," he says. "It's just a really cool animal."

More than a decade later, as a second-year student in Assiniboine's Land and Water Management program, Carter needed to decide what the subject matter of his Capstone Project would be. To him, the choice was obvious: bison.

After speaking with some local bison producers, he connected with the president of the Manitoba Bison Association, Robert Johnson, who agreed to sponsor his project.

"He said also that he'd love if I could come and present at their annual conference. Especially just coming out of COVID, they wanted to get some enthusiasm going."

His project was composed of two parts. "One part was a general information pamphlet, for the general public. And the second part was a booklet for bison producers or different types of producers, and the reasons why they should do bison, or why it should be an option for them if they're trying to diversify."

"Maybe somebody wants to get out of cattle farming or someone wants to switch from grain and cattle, to diversify their operation; just kind of giving them a bunch of information so they can make an educated decision on what they want to do."

He presented his project at the 2023 annual meeting of the Manitoba Bison Association this past February, and received a positive response from Association members. "The feedback was very positive," he says. "They asked a lot of questions."

"Some people came over and talked about the things I presented that they actually noticed with their own bison herd. Like, the bison do this specific behavior called wallowing, where the bison basically take a mud bath, or dirt bath, and they create a depression in the ground. It holds water, creating a separate mini-eco system. And there was one lady that came over and that she noticed that in her field after the bison go through it. It was cool to actually have that explained to her why that occurs.

Carter has developed a level of expertise regarding bison – to the point where experienced producers are asking him questions – but he doesn't think the big furry animals will be part of his future career plans. He took a year off after graduating from high school, and encouragement from a friend led him to the Land and Water Management program at Assiniboine.

He's currently pursuing his bachelor of science degree in Geography from Brandon University, where he was able to transfer credit hours for his two years of study at Assiniboine. Once he graduates, Carter eyes a future in urban planning.

Having graduated from Assiniboine last June, Carter has some advice for students entering ACC: "Learn as much as you can from the instructors, because they're very knowledgeable and very good at what they do."

"Take as many notes as you can and just enjoy the experience. Enjoy learning, because that's why you're going to school."

St. John Ambulance

To our Retiring Board of Directors: A Special Thank you to Dan Aberhart for your years of service on the Manitoba Ag Days Board. Your contributions to our show will live on for many years to come.

Thank You for your contributions to our organization.

Next level farming.

Farm health just got better. At Decisive Farming, we provide integrated farm management solutions for farmers by evolving our on-farm solutions while still providing outstanding on-farm service and customized solutions.

Let's get to work, together.

Visit us at Booth #647 in the Curling Club.

AGI is a global leader in the handling and storage of grain. We got here by making it our mission to look beyond individual products and services, to view every step of the grain handling, storage and conditioning process as part of an integrated whole. Safety, security, ease of handling and efficiency, are just some of the benefits derived from our big-picture approach. We think globally, but focus locally—ensuring that every aspect of this approach leads to improved profitability for your farm.
